

Exploring new technology for smarter streets and homes

connectingbristol.org/replicate

The REPLICATE project is focussing on:

Smart homes:

Trialling connected appliances, alongside other energy saving measures, in some households.

Smart streets:

Exploring new ways of getting around, supported by travel planning and parking apps.

Created by us:

Working with local people to explore new ways of tackling local problems with technology.

Reducing energy demand

Reducing environmental impact

Saving money on energy bills

Look out for events in the area
